Comments on the Improvements The subject is observed in fair overall condition. The appraiser is not certified to determine any structural deficiencies the subject may or may not have. All utilitites were off at the time of inspection. Should the client have the subject inspected by a qualified contractor and/or inspector, and determination is made that the subject is in need of repairs, the cost of those repairs should be deducted from the final estimate of value contained in this report. The estimate of value is made as-is. See the text addendum for appraiser recommended repairs/inspections.

Summary of Sales Comparison Approach All above sales are extracted from the subjects competing area. The appraiser has given most consideration to comparable #1 based on its proximity to the subject. The estimate of value is as-is.																
Comparable #2 has a lower overall effective age vs the subject (per interior MLS photographs) warranting a condition adjustment.																
Limited applicable area data has resulted in the use of three comparables closing in excess of six months, and one comparable located in excess of one mile.

Based on the scope of work, assumptions, limiting conditions and appraiser's certification, my (our) opinion of the defined value of the real property that is the subject of this report is \$ 23,000 as of 09/27/2018 , which is the effective date of this appraisal.																

Scope of Work, Assumptions and Limiting Conditions

Scope of work is defined in the Uniform Standards of Professional Appraisal Practice as " the type and extent of research and analyses in an assignment." In short, scope of work is simply what the appraiser did and did not do during the course of the assignment. It includes, but is not limited to: the extent to which the property is identified and inspected, the type and extent of data researched, the type and extent of analyses applied to arrive at opinions or conclusions.

The scope of this appraisal and ensuing discussion in this report are specific to the needs of the client, other identified intended users and to the intended use of the report. This report was prepared for the sole and exclusive use of the client and other identified intended users for the identified intended use and its use by any other parties is prohibited. The appraiser is not responsible for unauthorized use of the report.

The appraiser's certification appearing in this appraisal report is subject to the following conditions and to such other specific conditions as are set forth by the appraiser in the report. All extraordinary assumptions and hypothetical conditions are stated in the report and might have affected the assignment results.

1. The appraiser assumes no responsibility for matters of a legal nature affecting the property appraised or title thereto, nor does the appraiser render any opinion as to the title, which is assumed to be good and marketable. The property is appraised as though under responsible ownership.
2. Any sketch in this report may show approximate dimensions and is included only to assist the reader in visualizing the property. The appraiser has made no survey of the property.
3. The appraiser is not required to give testimony or appear in court because of having made the appraisal with reference to the property in question, unless arrangements have been previously made thereto.
4. Neither all, nor any part of the content of this report, copy or other media thereof (including conclusions as to the property value, the identity of the appraiser, professional designations, or the firm with which the appraiser is connected), shall be used for any purposes by anyone but the client and other intended users as identified in this report, nor shall it be conveyed by anyone to the public through advertising, public relations, news, sales, or other media, without the written consent of the appraiser.
5. The appraiser will not disclose the contents of this appraisal report unless required by applicable law or as specified in the Uniform Standards of Professional Appraisal Practice.
6. Information, estimates, and opinions furnished to the appraiser, and contained in the report, were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy of such items furnished to the appraiser is assumed by the appraiser.
7. The appraiser assumes that there are no hidden or unapparent conditions of the property, subsoil, or structures, which would render it more or less valuable. The appraiser assumes no responsibility for such conditions, or for engineering or testing, which might be required to discover such factors. This appraisal is not an environmental assessment of the property and should not be considered as such.
8. The appraiser specializes in the valuation of real property and is not a home inspector, building contractor, structural engineer, or similar expert, unless otherwise noted. The appraiser did not conduct the intensive type of field observations of the kind intended to seek and discover property defects. The viewing of the property and any improvements is for purposes of developing an opinion of the defined value of the property, given the intended use of this assignment. Statements regarding condition are based on surface observations only. The appraiser claims no special expertise regarding issues including, but not limited to: foundation settlement, basement moisture problems, wood destroying (or other) insects, pest infestation, radon gas, lead based paint, mold or environmental issues. Unless otherwise indicated, mechanical systems were not activated or tested.

This appraisal report should not be used to disclose the condition of the property as it relates to the presence/absence of defects. The client is invited and encouraged to employ qualified experts to inspect and address areas of concern. If negative conditions are discovered, the opinion of value may be affected.

Unless otherwise noted, the appraiser assumes the components that constitute the subject property improvement(s) are fundamentally sound and in working order.

Any viewing of the property by the appraiser was limited to readily observable areas. Unless otherwise noted, attics and crawl space areas were not accessed. The appraiser did not move furniture, floor coverings or other items that may restrict the viewing of the property.

9. Appraisals involving hypothetical conditions related to completion of new construction, repairs or alteration are based on the assumption that such completion, alteration or repairs will be competently performed.
10. Unless the intended use of this appraisal specifically includes issues of property insurance coverage, this appraisal should not be used for such purposes. Reproduction or Replacement cost figures used in the cost approach are for valuation purposes only, given the intended use of the assignment. The Definition of Value used in this assignment is unlikely to be consistent with the definition of Insurable Value for property insurance coverage/use.
11. The ACI General Purpose Appraisal Report (GPAR™) is not intended for use in transactions that require a Fannie Mae 1004/Freddie Mac 70 form, also known as the Uniform Residential Appraisal Report (URAR).

Definition of Value: ☒ Market Value ☐ Other Value: _____

Source of Definition: Appraiser data bank

Market value is the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he considers his own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

Clarification of Intended Use and Intended User: The Intended User of this appraisal report is the Client. The Intended Use is to evaluate the property that is the subject of this appraisal for a mortgage finance transaction, subject to the stated Scope of Work, purpose of the appraisal, reporting requirements of this appraisal report form, and Definition of Market Value. No additional Intended Users are identified by the appraiser.

The appraiser has read the code of conduct, and has completed the report in compliance. The appraiser has had no communication with any party directly involved with the production of the loan associated with the appraisal. There has been no undue influence put on the appraiser. There are no non-realty items or personal property given value in the report.

The comparable photographs have been selected from the appraisers data bank, which includes photos utilized on previous appraisals prepared by the appraiser. The appraiser has viewed each of the comparables from the street in the past 30 days.

I have not performed a service on the subject property in the past three years. Unless otherwise noted, the estimated exposure time for the subject is consistent with the marketing time noted for the entire neighborhood in the neighborhood section of the form, 3-6 months.

The final value estimate for the subject property does not represent the predominant value for residential properties in this market area, as shown on page 1 of the report. The subject property is within the stated price range for homes in this area; and the fact that the subject property is below the predominant value has no adverse effect on the subject's value or marketability. The estimate of value differs from the predominant by greater than 15% due to its overall condition vs the typical home in the area.

The appraisers office is within 77 miles from the subject, and the appraiser has the competency to complete the assignment. The appraiser is familiar with the subject area and has completed an estimated 10-15 reports in the area in the past 12 months. The appraiser utilized real info, assessor records, The Greater Buffalo Niagara Board of Realtors MLS, and other public record sources for data included in the report.

The appraiser did review the four test for highest and best use. Given the current zoning and the existence of other similar single family house its present residential use is felt to be its highest and best use.

No employee, director, officer or agent of the lender or any other third party acting as a joint venture partner, independent contractor, appraisal management company, or partner on behalf of the lender has influenced or attempted to influence the development, reporting, result, or review of this assignment through coercion, extortion, collusion, compensation, instruction, inducement, intimidation, bribe or in any other manner.

Flood Map Info:

Community	Panel	Zone	Date

The appraiser would recommend garage door repair, roof check by a qualified professional, interior and exterior debris removal, interior painting throughout, flooring restoration, kitchen/bath updating, landscaping to remove overgrown shrubbery, and a mechanical check by a qualified professional prior to the utilities being turned on. These items have resulted in the subjects "fair" overall condition rating.

The appraiser has verified the subjects taxes through the City of Jamestown Assessor on 09/28/2018 to be true and have been confirmed.

The inability by the appraiser to bracket the subjects age has no adverse effect on its overall appeal or marketability.

The differing design styles are accepted equally within the marketplace with no adjustment warranted.

Minimal value is given to the subjects garage, based on the fact it has seasonal use only (no driveway leading up to it).
